

SCSM2223

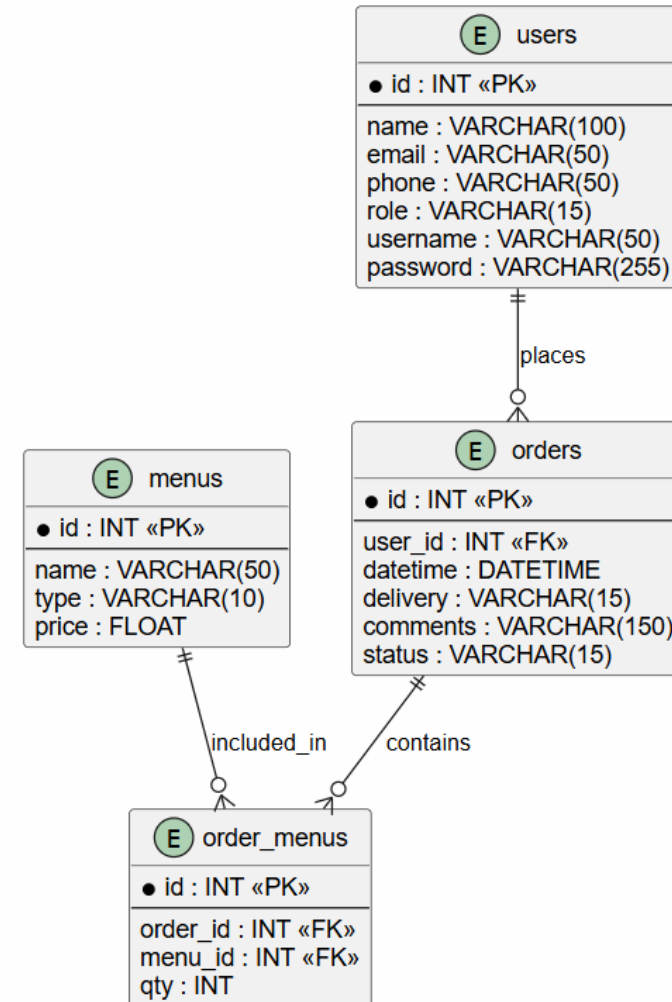

Cross Platform Application Development

2025/2026-2

Assignment 1

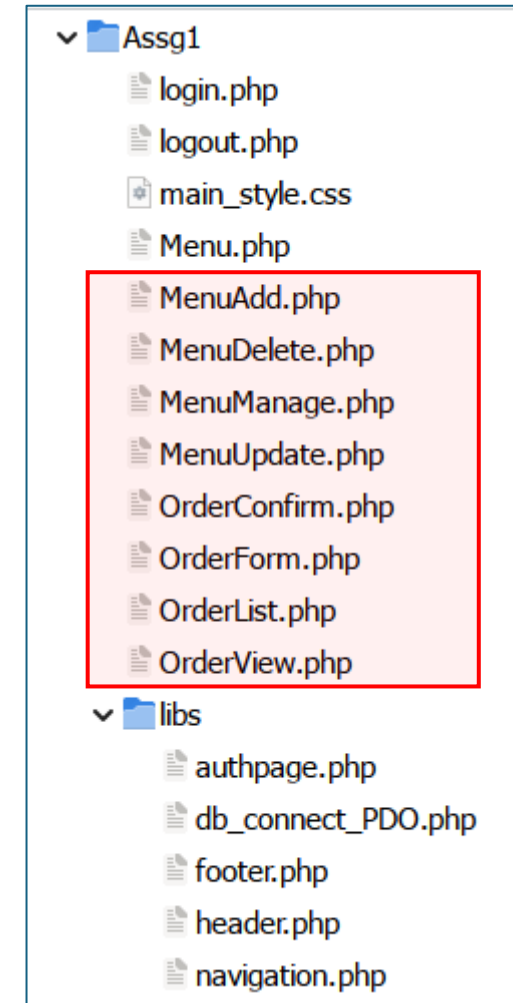

Database Preparation

- Download the [SQL-InitAssg1.txt](#) file and follow the given instructions to prepare the database tables required for this assignment.
- The diagram on the right illustrates the resulting database table design.

Assignment's Resource Files

- Download assignment resource files archived: [Assg1.zip](#)
- Extract the content of `Assg1.zip` file inside the `htdocs` or `WWW` folder of your Apache Web Server installation.
- The folder structure and contents of the source files are as shown in the figure on the right.
- The `login.php`, `logout.php`, and `libs/authpage.php` files have been completed to provide basic page access control within the system. Study how they are integrated and used in other PHP pages, as you may be applied the same mechanism in your project.
- Your task is to complete the implementation of PHP files highlighted in the red box based on the descriptions provided in the next slides.
